-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1) Applicants' election with traverse of invention I, drawn on claims 1-2, in the reply filed on 6/9/2005, is acknowledged. The traversal is on the ground(s) that the apparatus cannot be used to practice a different process, and that the search is co-extensive. This is not found persuasive because the apparatus can be used to practice a different process, for example, making a tobacco sheet, and the search is not co-extensive.

The requirement is still deemed proper and is therefore made FINAL.

Claims 3-4, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected election, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2) Claims 1-2, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Art Unit: 1731

Claim 1 is not clear as to what is the process: is the process a method of making a sheet, a method of making a intermediate sheet, or a rolling process. Claim should recite simplified positive action steps.

Claim 2 is not clear as to what is the process: is it a rolling process, or a slitting process. Claim should recite simplified positive action steps.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3) Claims 1-2, are rejected under 35 U.S.C. 103(a) as being unpatentable over Masanori (JP-2-235320). To the extend that the invention is understood, Masanori discloses a method of making an electrode for electrical double layer capacitor. In the process an activated carbon fiber and polymer resin, propylene glycol and PTFE are mixed are mixed and kneaded to obtain a rubber like viscous mixture. This mixture is rolled by a roll to obtain a sheet of a prescribed thickness. It would have been obvious, to one skilled in the art at the time the invention was made, that the sheet be slit for sizes required for the product size dimensions and that the sheet be rolled into a winding section to preserve the product made..
